

REPLACEMENT ABSTRACT

A color proof forming apparatus, ~~which~~ having: ~~[[the]]~~ a structure in which a plurality of light sources with ~~[[the]]~~ different wavelengths are provided, and ~~[[the]]~~ a light sensitive material is exposed to the light beams emitted from the plurality of light sources; an image processor to receive image data of a plurality of colors ~~of image data~~ including the ~~[[black]]~~ color black, and to form the data for the exposure; a controller to control the plurality of light sources according to the data for the exposure formed by the image processor, wherein the image processor forms ~~[[the]]~~ different exposure data for ~~the exposure which is different in image data in which~~ ~~[[the]]~~ black color and other colors are overlapped with each other overlap, ~~[[and]]~~ than for image data of only ~~[[the]]~~ black color.
